

# BALLOON ROCKET DIRECTIONS

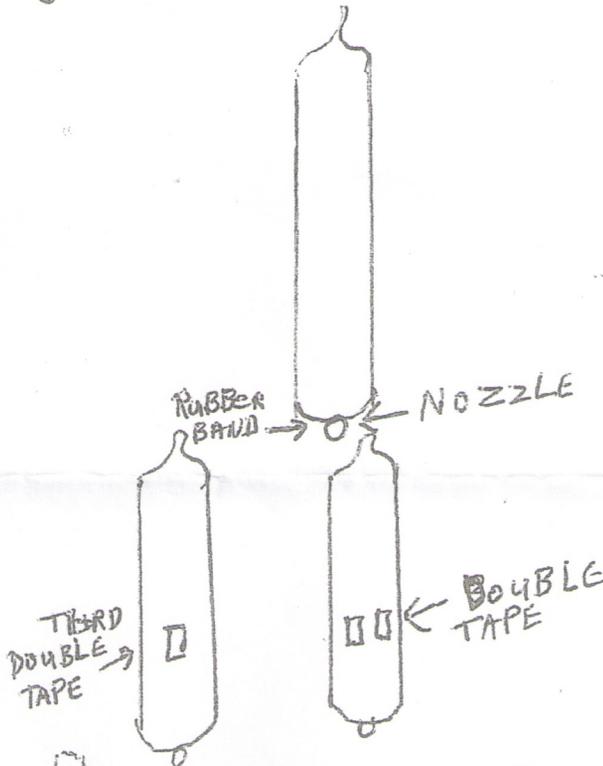

By Ron Lighty [www.jasoncompany.com](http://www.jasoncompany.com) Copyright Aug.2012

## step 1

Blow 360 balloon up. Leave three inches uninflated.  
Use rubber band at nozzle to keep air from coming out,  
Winding around nozzle several times.

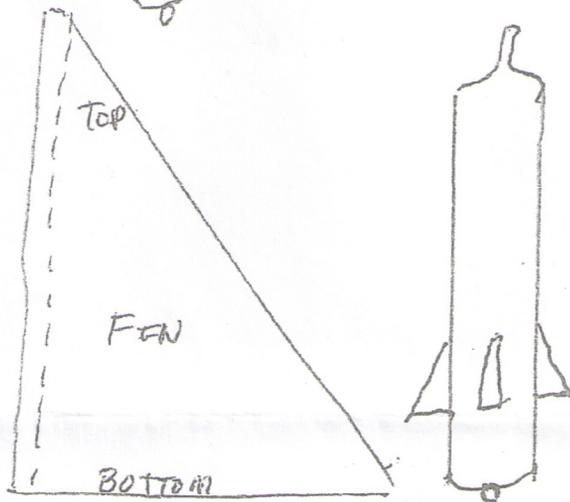

## Step 2

Place double tape on balloon about four inches above  
Nozzle; three equal places around balloon

## Step 3

Place three paper fins on balloon, taping the lip to  
Balloon with fins sticking out, and the lip against the  
Balloon. Fold rocket fin on dotted line.

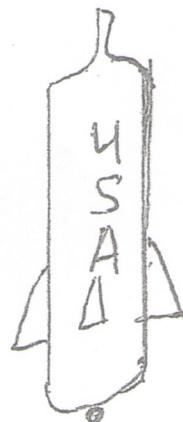

## Step 4

Take rubber band off and release balloon. Before you  
Take rubber band off, squeeze balloon above rubber band  
To hold air in until ready for blast off. Note: sharpie magic  
Marker can be used to decorate balloon rocket

## Step 5

Balloon can be launched several times. After blowing up  
Balloon reshape fins and launch again. Repeat process
